SUMMARY

Cloud infrastructure and DevOps engineer experienced in designing, securing, automating, and operating scalable Azure, AWS, and GCP environments. Strong hands-on expertise in Terraform, cloud networking, IAM, CI/CD, observability, resiliency, cost optimization, and CSX Transportation delivery.

WORK EXPERIENCE

Cloud DevOps Engineer — CORYS (CSX Transportation) **May 2026 - Present**

- Built and standardized Azure PR/CI/CD across 3 Angular, FastAPI, and .NET 8 repositories using a dedicated self-hosted VM, taking automated build-and-deploy coverage from 0% to 100%.
- Authored 10+ Terraform modules for Container Apps, PostgreSQL, Key Vault, Service Bus, Batch, Storage, and Log Analytics, bringing 100% of QA and Dev infrastructure under IaC.
- Deployed DevSecOps and cloud security using SonarQube, OWASP Dependency-Check, Trivy, Checkov, TFLint, Key Vault, RBAC, and managed identities; resolved a multi-day QA outage, closed 60+ incidents, and defined a Dev/UAT/Prod cost strategy.

DevOps Engineer — ComTec Information Systems, Irving, TX **May 2023 - May 2026**

- Led provisioning of cloud infrastructure using Terraform across GCP and Azure, deploying GKE clusters, VPCs, and Azure networking components, improving resource utilization by 20% and reducing build times by 30 minutes.
- Enhanced CI/CD pipelines using Jenkins and Cloud Build across GCP and Azure environments, increasing deployment speed by 30% while improving release stability and consistency.
- Implemented Docker containerization for 7 applications and orchestrated deployments on Kubernetes (GKE), boosting application scalability by 40% and cutting environment inconsistencies by 30%.
- Established Prometheus and Grafana monitoring, increasing system visibility by 35% and reducing incident response time.

DevOps Engineer — Wealus Technology Solutions Pvt Ltd, Hyderabad, IND **May 2020 - Apr 2022**

- Architected robust CI/CD pipelines with Jenkins, cutting down deployment failures by 30% and accelerating release velocity, leading to a 40% boost in deployment frequency.
- Provisioned cloud infrastructure across AWS (EC2, S3) and GCP using Terraform, enabling scalable and repeatable environments, reducing manual provisioning effort by 50% and improving deployment consistency.
- Orchestrated the migration of 5 applications to Docker and Kubernetes (EKS & GKE), bolstering application scalability and diminishing deployment failures by 30%.
- Implemented centralized logging using ELK Stack and CloudWatch, improving troubleshooting efficiency and reducing issue resolution time by 35%.
- Configured IAM roles, VPC networking, and security groups, strengthening security posture and reducing unauthorized access risks by 25%.
- Established monitoring and alerting solutions using Prometheus and Grafana, enhancing system observability and lowering MTTR by 30%.

TECHNICAL SKILLS

Cloud Platforms: AWS, GCP, Azure
Cloud Architecture & Networking: Azure VNet, GCP VPC, AWS VPC, IAM, RBAC, Security Groups, Firewall Rules, Kubernetes Networking
DevOps & IaC / CI-CD: Terraform, Ansible, CloudFormation, Helm, Jenkins, GitHub Actions, Azure DevOps, Cloud Build
Security & Governance: Azure Key Vault, Managed Identities, DevSecOps, Trivy, Checkov, OWASP Dependency-Check
Containers & Orchestration: Docker, Kubernetes (GKE, EKS), Azure Container Apps
Monitoring & Logging: Prometheus, Grafana, ELK Stack, CloudWatch, Azure Monitor, Log Analytics, Application Insights, Splunk
Programming, Data & AI: Python, Bash, Java, SQL, MySQL, PostgreSQL, MongoDB, BigQuery, Git, Kafka, LLMs, NLP, RAG, Gemini, GPT, LangGraph

PROJECTS

BaristaBot - AI-Powered Cafe Ordering System | Python, LLM, NLP, LangGraph, Gemini API

- Developed a conversational AI chatbot using LLMs and NLP to handle natural language cafe orders with 95% accuracy, improving user interaction and order efficiency.
- Integrated Gemini API and LangGraph for real-time menu understanding and response generation, reducing order latency by 30%.

AI Financial Insights Chatbot | Python, Pandas, NLP

- Built an AI-driven financial insights chatbot using Python, Pandas, and NLP to process 50+ SEC filings, achieving 98% extraction accuracy and reducing manual analysis effort by 40%.

EDUCATION

The University of Texas at Arlington **May 2024**
Master of Science, Computer Science
Specialization-Software Engineering & Big Data

Gitam University **May 2022**
Bachelor of Science, Computer Science
